

mdc

A Markdown-to-PDF compiler based on pandoc and LaTeX that produces nice-looking documents using a custom LaTeX template for pandoc.

Installation

To install on a Unix-type OS, follow these steps:

1. Install **pandoc** and **texlive**, or any other LaTeX distribution.
2. Clone this repository:

```
$ git clone https://github.com/mathialo/mdc.git
```

3. Install the LaTeX template for pandoc:

```
$ cp path/to/mdc-template.latex ~/.pandoc/templates/
```

4. Create a symlink to **mdc.sh** in **/usr/local/bin**, or any other directory in your **\$PATH**:

```
$ ln -s /full/path/to/mdc.sh /usr/local/bin/mdc
```

Now you should be set to convert your Markdown documents to PDFs:

```
$ mdc document.md
```

See *README.pdf* for a PDF version of this readme created with mdc.
